# Edukids Presentation

Project by: Dev de Babi

Problem

- Lose of interest in learning with the same long established patterns,

- The joy of learning is not really felt anymore,

- the access to education is limited in the sense that once at home learners / students forget the notebooks.

Value proposition

Edukids is the best app to learn passively. Few taps and childrens can acquire new knowlegde on several themes in a fun and intuitive way. The courses are accessible at any time at home or outside. Learning can also be fun.

Underlying magic

Must register to start using the app

Users save their progression online for a better review.

Have access to a multitude of courses according to your learning choices

Users are free to choose the field they want to study.

Learn with games and AR interactions

User learn by playing games and interacting with their subject matter.

Thank you
